

**Ramps
for access**

Because independence matters

GRiP Step **STANDARD**

GRiP Steps reduce the risk of trips and falls when negotiating high external doorsteps.

Positioned in front of your doorstep, a GriP Step removes the need for one large step to be taken, instead allowing for two much smaller steps, helping for a safer entry/exit.

Corrosion and slip resistant, our metal GRiP Steps are available in STANDARD and LARGE widths. The two widths are designed to suit people of all heights and weights with no additional ground works required.

Simple to install and remove, GRiP Steps can quickly improve access to your home with minimal disruption. They're also easy to store and refurbish for reuse, making for a budget friendly, environmentally conscious and safe solution.

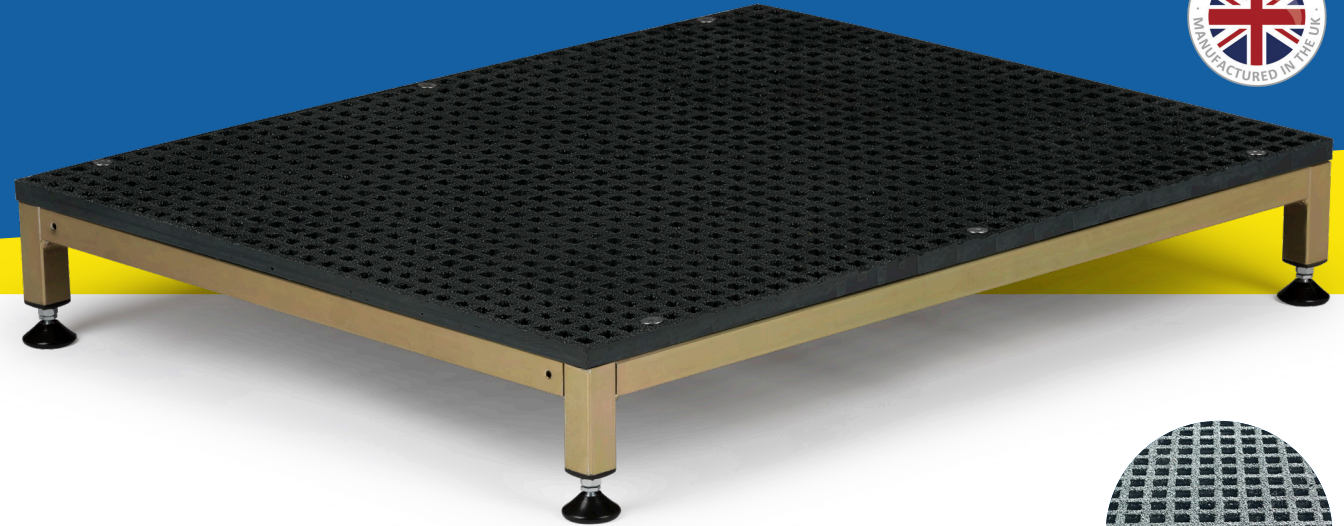

SPECIFICATION

Height	115mm (4½in)
Length	760mm (30in)
Width	405mm (16in)
Tread	Glass Reinforced Plastic (GRP) with open mesh
Frame	Anti-rust zinc-coated alloy
